

## F 1008 – Azraq oasis area

Well F 1008 “AHMAD SHAWQI 2” is located in the western part of the Azraq oasis area close to the AWSA wellfield. The linear trend for all available data is  $-34 \mu\text{S}/\text{cm}/\text{yr}$ , but the  $R^2$  is 0.15, and the scatter around the trend is large. The data represent two sampling periods, the early 1980's and the late 2000's. There are no data between 1984 and 2005. This trend is considered highly uncertain and should not be used to forecast salinity at this location.
